Coronavirus (COVID-19)

PSSC, like all companies, is concerned with the unprecedented global challenges that we are facing due to coronavirus (COVID-19). Please be assured that during this time of uncertainty, the health and safety of our Team Members and Customers is our highest priority.

In addition to monitoring guidance from local, and national organizations, we are taking precautionary measures to ensure that our offices will minimize risk. Our customer site sales visits and installations will be curtailed until further notice. We will explore the possibilities on video setup for critical instrument installations and proceed with in person contact as soon advised by the CDC.

PSSC is fully operational, ready and available to satisfy any of your calibration and service needs in North America. We are here to support the essential infrastructure of the oil & gas industry and keep our transportation systems up and running.

We will continue to monitor the situation, remain vigilant, caring and continue to communicate with our customers if there are any changes to our operational status.

Sincerely,

Todd F. Kirkland
Technical Services Director
